(54) METHOD AND APPARATUS FOR CONTROLLING REPRODUCTION OF VIDEO CONTENTS

(57) Abstract:

PURPOSE: A method and an apparatus for controlling reproduction of video contents are provided to pause video reproduction at the wanted scene or resume the reproduction from the wanted scene without additionally requesting skip. CONSTITUTION: A method for controlling reproduction of video contents includes the steps of selecting a candidate position required by a user by using reproducing direction, reproducing speed, user reaction time, structural and meaning index information if the user requests pause or reproduction from the current position during normally reproducing or high-speed searching the video contents; reselecting change points of structural and meaning index information existing within a fixed range of the selected candidate position as candidate positions; selecting the reselected candidate position closest to the request of the user as actual reproduction resumption or pause position.
